

Air 1 is one of the few radio stations that actually benefits listeners across the United States. It educates listeners of the teachings of the bible, edifies listeners by building them up, and constantly encourages listeners. Air 1 serves me by giving me something positive to listen to on a daily basis and helping me as a Christian. As I am driving around with younger children, such as my nephew, I do not have to worry about vulgar language and corrupt messages being heard by these children; Air 1 plays quality music with a positive message. If Air 1 was replaced by an LPFM broadcaster providing other programming, there would be nothing positive and encouraging to listen to on the radio. Air 1's service is in the public interest by providing music that is uplifting and encouraging, making the people listening have a more positive attitude. This effects anyone they come into contact with. It is one of the best ways of sharing God's love. Air 1 must never be taken off the radio.
